08/2016 - 05/2021

Csec- Bridgeport High School

- CSEC Subjects - 5

SUMMARY

As a dedicated IT Technician and programming intern, I bring a strong foundation in both software development and IT infrastructure. My experience spans coding full-stack applications and building automation tools, complemented by a solid grasp of network and system operations. I thrive in collaborative environments, continuously learning and applying modern technologies to deliver practical, user-focused solutions. Known for my attention to detail and proactive mindset, I aim to bridge the gap between development and IT operations for well-rounded project success.

PERSONAL PROJECTS

Social Media App

03/2025 - 05/2025

St.Catherine

Short Summary

- Built a full-stack social media application using MERN stack. (React, Node.js, Express, and MongoDB). Developed and debugged core features, including user authentication, profile picture uploads, and a dynamic feed for displaying posts from followed users.

Voice Assistant Project

2022 - 08/2024

St.Catherine

Short Summary

- Created a voice-controlled assistant using python. Integrated speech recognition and natural language processing to perform tasks such as sending emails, playing music, and fetching information on the web open voice request.

SKILLS

Active Directory · Html & css · React ·
