Software Developer

Software Developer with hands on experience in AI driven systems, network administration, and full stack application development. Proven ability to design scalable, secure, and automated solutions across insurance, finance, and public sector environments.

WORK EXPERIENCE

Sagicor Innovation Lab • Jamaica • 06/2025 - 12/2025

Software Engineer

- Engineered an AI-powered claims system to analyze life and health claims and apply Sagicor business rules for automated decisions.
- Built a parallel multi-model AI engine (ChatGPT, Gemini, Claude, Grok, DeepSeek) to improve reliability and confidence scoring.
- Implemented a 12-step automated pipeline for policy validation, fraud detection, beneficiary checks, and approvals.
- Developed an AI benchmarking framework ranking models by accuracy, speed, confidence, and compliance.
- Designed a React + TypeScript dashboard with a Node.js/MongoDB backend for real-time monitoring and audit logs.

(SwifPay Project- SwifPay Digital Wallet Platform)

- Collaborated with a cross-functional team to design, build, and deploy SwifPay, a digital wallet platform created in partnership with UTech Jamaica.
- Engineered REST APIs with Node.js and Express to support a financial transaction system serving 12,000+ students.
- Implemented CI/CD pipelines and supported infrastructure automation, testing, and production deployments.
- Built and optimized MySQL stored procedures to improve performance in high-volume transaction workflows.
- Integrated an AI LLM into the SMS system to generate structured JSON responses, improving automation and accuracy.

Portmore Municipality Council • Braeton Pkwy, Portmore • 07/2024 - 08/2024

IT Technician (Intern)

- Configured and managed servers, Hyper-V VMs, virtual disks, and switches.
- Implemented folder redirection via Default Domain Policy.
- Assigned IPs, installed Windows, and joined printers, switches, and surveillance systems to the domain.
- Managed OUs, user accounts, and permissions and configured SSRS and Microsoft Data Tools.
- Maintained PCs, networks, and peripherals; performed troubleshooting and repairs.

National Works Agency (NWA) • Kingston • 06/2023 - 07/2023

Network Administrator (Intern)

- Replaced faulty NAS hard drive to fix server issues.
- Configured VLANs using Cisco Packet Tracer.
- Managed permissions and access to network resources.

EDUCATION

BA of Science in Computer, Networking & Security, Cyber Security

The University of Technology • Old Hope Road, Kingston • 08/2023 - 01/2026

Pending

Associate Degree Management Information Systems

Portmore Community College • Portmore • 07/2021 - 08/2022

PROJECTS

CASHLY-Personal Budget Tracker (React + MongoDB)

Built a full-stack React and MongoDB application using AI to extract transactions from emails, track spending, and visualize budgets.

Social Media application

Developed a MERN-stack social media platform with authentication, profile uploads, and a dynamic follower-based feed.

Voice Assistant Project

Created a voice-controlled assistant using python. Integrated speech recognition and natural language processing to perform tasks such as sending emails, playing music, and fetching information on the web open voice request.

Retrieval-Augmented Generation (RAG) Chatbot

Created a Retrieval-Augmented Generation chatbot using Gemini AI to retrieve and synthesize internal documentation for automated support.
